OBJECTIVE

I co-founded a real estate marketplace from scratch, shipped mobile apps with 3,000+ downloads, and ran my own growth campaigns to acquire real users. Now I am channeling that hands-on experience into a Data Science & Engineering degree at UC3M, where I am developing a rigorous foundation in ML, analytics, and data systems. Next, I am looking to join a data-driven team where I can apply both my engineering instincts and analytical skills to solve meaningful problems.

EXPERIENCE

Bluebee

Madrid, Spain

Founder & Full Stack Developer

July 2024 – November 2025

- Co-founded and built a **cross-platform real estate marketplace** connecting tenants and landlords
- Designed and implemented the full mobile app (**React Native, TypeScript**), published on **iOS and Android**
- Co-developed **REST backend** with Django (OAuth, listings, matching, chat)
- Acquired **~200 users** through TikTok, Google Ads, and Meta Ads and ran **A/B tests** on ad creatives

Dental Clinic Website 🔗

Karlovy Vary, Czechia

Web development

January 2026

- Designed and developed a mobile-first website for a dental clinic using **Astro and JS**
- Implemented **Posthog** analytics to track user behavior and site traffic and improved online visibility and lead tracking

ICEPUFF

Madrid, Spain

Freelance Web Developer

March 2026 – May 2026

- Built the **Shopify** storefront for a 3D-printed handbag startup
- Developed an interactive **3D product configurator** using **Three.js** for real-time bag customization

Triddance

Madrid, Spain

Data Collection

November 2025

- Used **AI** to scrape 30 years worth of historical long distance triathlons. Compiled data into a structured spreadsheet

PROJECTS

Neural Network Game 🔗

- Created a game where a **Deep Neural Network** learns to play from the user
- Implemented a dense neural network with **Tensorflow.js** and **p5.js**

Visit my [personal website](#) 🔗 for more projects

EDUCATION

Universidad Carlos III de Madrid

Madrid, Spain

Bachelor in Data Science and Engineering

August 2023 – Present

- **Coursework:** Neural Networks, ML, Analytics, Optimization, Data Structures, Databases, Computer Networks

Pulaski High School

Pulaski(Wisconsin), USA

High School Exchange program

2018 - 2019

SKILLS

Languages: Czech (Native), English (Fluent), Spanish (Fluent), German (Beginner)

Coding Languages : Python, TypeScript, R, HTML/CSS, SQL (PostgreSQL, MySQL), NoSQL, Java

Libraries: Sci-kit learn, TensorFlow.js, PyTorch, React, React Native, LangChain, Flask, Django

Tools: Google Cloud, Firebase, Docker, Supabase, N8N, Figma, Posthog, Git, Linux
